## Air Traffic Hubs December 31, 1992

## **INTRODUCTION**

There are some major changes in this publication due to the new T-100 data collection system for U.S. air carriers which began January 1, 1990. The format has been changed to comply with the regulations of 14 CFR 241.19.6 that restrict public disclosure of T-100 detail and summary international data. Non U.S. airport data does not appear. Data is no longer broken out by domestic or international operations at airports, only system operations are shown.

This edition presents the volume of revenue passenger, freight, and mail traffic handled by the nation's large certificated air carriers at each airport served by these scheduled airlines during the 12 months ending December 31, 1992. In addition, a presentation of aircraft departures is shown including detail by aircraft type for total departures performed in scheduled, nonscheduled, and all services.

Large certificated air carriers hold Certificates of Public Convenience and Necessity issued by the Department of Transportation (DOT) authorizing the performance of air transportation. Large certificated air carriers operate aircraft with seating capacity of more than 60 seats or a maximum payload capacity of more than 18,000 pounds. Data for charter only, commuter, intra-state, and foreign-flag air carriers are not included in this publication.

### **SOURCE OF DATA**

The data in this publication are compiled from information reported to the DOT by the large certificated air carriers on Schedules T-100 and T-3, RSPA Form 41, Uniform Systems of Accounts and Reports for Large Certificated Air Carriers.

### **PRESENTATION OF DATA**

The data in this publication are presented in seven tables. The first two tables contain summary data by type of service for carrier groups and individual air carriers and summary figures by area and state. Tables 3, 4, and 5 show activity in air carrier system operations at large, medium, and small air traffic hubs. The last two tables in the publication present detailed statistics by community and airport. In addition, the last table has a presentation of total aircraft departures performed by specific aircraft type. In this table, an asterisk printed to the left of the aircraft designation denotes that the statistics shown relate to all cargo service.

In Tables 6 and 7, each community is listed under the state in which it is located without regard to the location of the airport. Cincinnati, Ohio, for example, is shown under Ohio although the Greater Cincinnati Airport is located in Covington, Kentucky. An exception to this policy occurs in those cases where a hyphenated point shown in a Certificate of Public Convenience and Necessity is serviced by a single airport and a state line separates the communities named. In those cases the data are listed under the state in which the airport serving the communities is located. For example, Quincy, Illinois/Hannibal, Missouri, is a hyphenated point. Since the airport is located in Quincy, Illinois, the data for both communities are shown under that city and state. In this publication, some community groupings have been made in accordance with the Federal Aviation Administration's concept of the air traffic hub structure. (See AIR TRAFFIC HUBS.)

### **CRITERIA FOR INCLUSION OF DATA**

Data are included for only those airports at which aircraft departures were performed in scheduled service. Data for nonscheduled service are included if the operation takes place at an airport at which the air carrier does provide scheduled service. Therefore, nonscheduled enplanements for scheduled service air carriers are missing if the operation takes place at an airport where scheduled service is not performed. Likewise, all of the enplanement statistics for nonscheduled service air carriers are not presented. Because of the missing statistics, this publication only contains the following percentages of the total: 97 percent of departures, 98.7 percent of passengers enplanments, 90.3 percent of freight and 99.6 percent of mail enplanements. There is a small number of airports in Table 6 that are listed, but do not show any enplanements. In these situations, the air carrier did report scheduled departures, but did not report any enplanements at that airport.

## REPORTING CARRIERS

|                |                |                 |                 |               |                |

## AIR TRAFFIC HUBS

### DEFINITION

The air traffic structure was developed by the Federal Aviation Administration and is used to measure the concentration of all civil air traffic. The hub structure is Federal Aviation Administration's (FAA) principal operations control and the fundamental control for most of the FAA's economic and operations research procedure. Within this one medium are consolidated the social and economic factors that influence a community's ability to generate air carrier or general aviation traffic.

Air traffic hubs are geographical areas, and are based on the percentage of total passengers enplaned in the area. A hub may have more than one airport in it. This definition of hub should not be confused with the definition being used by the airlines in describing their 'hub and spoke' route structures.

These geographical areas are the cities and Standard Metropolitan Statistical areas (SMSA) requiring aviation services. An SMSA is a county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships. These metropolitan areas constitute a primary focal point for the transportation research program of the FAA, and the analyses of individual cities within an area are treated in relationship to the entire area. In those instances where two or more individually certificated communities are located in a SMSA, those communities are grouped under the SMSA definition throughout this publication.

### CLASSIFICATION

Individual communities fall into four hub classifications as determined by each community's percentage of the total enplaned revenue passengers all services and all operations of U.S. certificated route are carrier within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Table 6 contains the type of hub for each community; 'L' (large), 'M' (medium), 'S' (small), and 'N'(nonhub). Classifications in this issue are based on 447,625,988 total enplaned revenue passengers.

The percentage and number of enplaned passengers in the hub classifications for 12 months ending December 31, 1992 are:

| Hub Classification | Percent of total enplaned passengers | Number of enplaned passengers |
|--------------------|--------------------------------------|-------------------------------|
| Large (L) .....    | 1.00 or more                         | 4,476,260 or more             |
| Medium (M) .....   | 0.25 to 0.9999                       | 1,119,064 to 4,476,260        |
| Small (S) .....    | 0.05 to 0.249                        | 223,812 to 1,119,064          |
| Nonhub (N) .....   | Less than 0.05                       | Less than 223,812             |

## AIR TRAFFIC HUBS—Continued

### HUB RESULTS

During 1992 there were 126 air traffic hubs representing 25% of the 496 air traffic hubs and nonhubs in the 50 States, the District of Columbia, and other U.S. areas receiving air carrier service during the year. The dominance of the hubs in air traffic patterns is brought out by the fact that almost 98% of passenger enplanements were recorded at these 126 hubs. The table below shows the number of hubs/nonhubs and the number and percentage of passenger enplanements at the hubs/nonhubs.

| Hub Classification | Number of Hubs/nonhubs | Number of Airports | Passengers Enplaned | Passengers Percent |
|--------------------|------------------------|--------------------|---------------------|--------------------|
| Large .....        | 26                     | 49                 | 319,582,090         | 71.39              |
| Medium .....       | 31                     | 39                 | 80,800,955          | 18.05              |
| Small .....        | 69                     | 73                 | 36,879,632          | 8.24               |
| Nonhub .....       | 370                    | 382                | 10,363,311          | 2.32               |
| TOTALS .....       | 496                    | 543                | 447,625,988         | 100.00             |

## CITY CROSS REFERENCE LIST

| Cities not listed in alphabetic order or not specifically noted | Included in:  |
|---|---|
| Anaheim, CA .....   | Los Angeles/Burbank/Long Beach/Orange County            |
| Ann Arbor, MI .....   | Detroit & Ann Arbor                                     |
| Arcata, CA .....  | Eureka/Arcata   |
| Ashland, KY .....   | Ashland/Huntington (Under West Virginia)                |
| Ashland, WI .....   | Ironwood/Ashland (Under Michigan)                       |
| Auburn, ME .....  | Lewiston/Aubum  |
| Barre, VT .....   | Montpelier/Barre  |

| Yorktown, VA .....  | Newport News/Hampton/Williamsburg/Yorktown          |

## GLOSSARY

**aircraft departure**—An aircraft takeoff made at an airport.

**aircraft type**—A distinctive model of an aircraft as designated by the manufacturer.

**airport**—A landing area regularly used by aircraft for receiving or discharging passengers or cargo.

**air traffic hub**—Air traffic hubs are not airports; they are the cities and Standard Metropolitan Statistical Areas requiring aviation services. Communities fall into four classes as determined by each community's percentage of the total enplaned passengers in scheduled and nonscheduled service of the domestic certificated route air carriers in the 50 States, the District of Columbia, and other U.S. areas designed by the Federal Aviation Administration. Tables 3,4, and 5 contain the type of hub for each community: 'L' (large), 'M' (medium), 'S' (small), and 'N' (non-hub).

**all services**—The total of scheduled and nonscheduled transport services.

**carrier group**—A grouping of large certificated air carriers determined by annual operating revenues as shown below:

| Carrier Group          | Annual Operating Revenues          |
|------------------------|------------------------------------|
| Majors .....           | over one billion dollars           |
| Nationals .....        | 100 million to one billion dollars |
| Large regionals .....  | 10 to 100 million dollars          |
| Medium regionals ..... | up to 10 million dollars           |

**Certificate of Public Convenience and Neccesity**—A certificate issued to an air carrier under Section 401 of the Federal Aviation Act by Department of Transportation (DOT) authorizing the carrier to engage in air transportation.

**certificated**—Holding a currently valid Certificate of Public Convenience and Necessity.

**certificated air carrier**—An air carrier holding a Certificate of Public Convenience and Necessity issued by DOT to engage in air transportation.

**community**—A city, group of cities, or a Standard Metropolitan Statistical Area receiving scheduled air service by a certificated route air carrier.

**departure**—See 'aircraft departure'.

**domestic operation**—In general, operations within and between the 50 States of the United States, the District of Columbia, American Samoa, Caroline Islands, Guam Island, Johnston Island, Marianna Islands, Midway Island, Puerto Rico, U.S. Virgin Islands and Wake Island.

**enplaned passengers**—The total number of revenue passengers boarding aircraft.

**enplaned revenue tons of freight and mail**—The number of revenue tons of freight and mail loaded on an aircraft including originating and transfer tons.

**express**—Originally, express referred, to the priority movement, of parcel shipments moving on aircraft in conjunction with an agreement between the various air carriers and REA Express, Inc. Following the cessation of operations of REA Express, Inc., in 1976, this term refers to the replacement services offered by the various air carriers. Express is now included in freight.

**foreign mail**—Mail transported from a point outside of the United States by U.S.-flag carriers for a foreign government.

**freight**—Property transport by air.( Excludes mail and passenger baggage.)

**hub type**—See 'air traffic hub'.

**hyphenated point**—Basically two or more neighboring communities which, in terms of authorization shown in a carrier's Certificate of Public Convenience and Necessity, are treated as a single community.

**international operations**—In general, operations outside territory of the United States, including operations between the United States and foreign countries.

**large air traffic hub**—A community enplaning 1.00 percent or more of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see ‘air traffic hub’.

**large regionals**—See ‘carrier group’.

**majors**—See ‘carrier group’.

**medium air traffic hub**—A community enplaning from 0.25 to 0.99 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see ‘air traffic hub’.

**medium regionals**—See ‘carrier group’.

**national**—See ‘carrier group’.

**nonhub**—A community enplaning less than 0.05 percent of the total enplaned passengers in all services and all operations all communities within the 50 States, and District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see ‘air traffic hub’.

**nonscheduled service**—Revenue flights that are not operated in regularly scheduled service such as charter flights.

**other U.S. areas**—Areas under U.S. jurisdiction, other than the 50 States and the District of Columbia, that are designated the Federal Aviation Administration to be included in the base for air traffic hub classification computations.

**percent of enplanements**—The percent that a community’s enplaned passengers is of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see ‘air traffic hub’.

**piston aircraft**—An aircraft fitted with engines in which pistons, moving back and forth, work upon a crankshaft or other device to create rotational movement.

**revenue**—Pertaining to transport activities for which remuneration is received by the carrier.

**revenue passenger**—Person receiving air transportation from an air carrier for which remuneration is received by the carrier. Air carrier employees or other receiving air transportation against whom token service charges are levied are considered nonrevenue passengers. Infants for whom a token fare is charged are not counted as passengers.

**scheduled service**—Transport service operated over an air carrier’s routes, based on published flight schedules, including extra sections.

**small air traffic hub**—A community enplaning from 0.05 to 0.24 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see ‘air traffic hub’.

**standard metropolitan statistical area**—A county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships.

**total departures performed in all services**—The total number of aircraft takeoffs made in scheduled and nonscheduled service.

**total departures performed in nonscheduled service**—The total number of aircraft takeoffs made in nonscheduled service.

**total departures performed in scheduled service**—The total number of aircraft takeoffs made in scheduled service including extra sections.

**turbofan aircraft**—Aircraft propelled by a turbojet engine whose thrust has been increased by the addition of a low-pressure compressor (fan). The turbofan engine can have an oversized low-pressure compressor at the front with part of the flow bypassing the rest of the engine (front-fan or forward-fan) or it can have a separate fan driven by a turbine stage (air-fan).

**turbojet aircraft**—Aircraft propelled by jet engines incorporating a turbine-driven air compressor to take in and compress the air for the combustion of fuel, the gases of combustion (or the heated air) being used both to rotate the turbine and to create a thrust-producing Jet.

**turboprop aircraft**—Aircraft in which the main propulsive force is supplied by a conventional propeller driven by a gas turbine. Additional propulsive force may be supplied from the discharged turbine exhaust gas.

**turboshaft helicopter**—A helicopter powered by one or more gas turbine engines. type of operation. Airport activity in domestic, international or total (system) operations. type of service. Airport activity in scheduled, nonscheduled, or all services.

**Note:** The terms in this Glossary are defined as they pertain to this publication.

**TABLE 1**  
**Summary of Aircraft Departures, Enplaned Revenue Passengers, and Enplaned Revenue Tons of Freight and Mail**  
**By Type of Service, By Carrier Group, and By Air Carrier**
